Backend Project Ideas

Beginner-Advanced...

```

You, 7 months ago | 1 author (You)
import VueRouter from "vue-router";
import routes from "../routes/routes";
import store from "../store/index";
import vuex118n from "vuex-118n";
import enLangFile from "../lang/en";

// Get config file into the global variable
window.config = require("../vue.config");

// Import bootstrap file
require("../bootstrap");

// Get vue globally
window.vue = require("vue");

require("../translations");

// Get vue-i18n locale management
const vue-118n = store

// vue-i18n
const vue-118n = {
  locale: 'en',
  messages: {
    en: enLangFile
  }
};

```

Beginner

A

B
